

TARGET MARKET DETERMINATION FOR EXTRA CARE COVER ISSUED UNDER ONECARE

Issuer of this TMD: OnePath Life Limited (OPL)
ABN: 33 009 657 176
Date TMD is effective: 27 September 2021
TMD version: 1

About this document

This document is a Target Market Determination (TMD). It sets out the target market for extra care cover under the OneCare product suite (Extra Care Cover). This TMD also sets out how the product is distributed, review periods and triggers relating to the TMD, and reporting on and monitoring of the TMD. It forms part of OPL's design and distribution framework and is required under section 994B of the Corporations Act 2001 (Cth).

This TMD has been prepared to give consumers, distributors, and staff an understanding of the target market for Extra Care Cover, based on consumer objectives, financial situation and needs.

This document is not a Product Disclosure Statement (PDS) and is not a summary of the features or terms of the product. This document does not take into account any person's individual objectives, financial situation or needs. Persons interested in acquiring this product should carefully read the PDS for OneCare and OneCare Super before making a decision to apply for this product. The PDS can be found at onepathinsurance.com.au. Consumers may want to consider obtaining personal financial advice to ensure the cover they select is tailored to their personal needs, objectives, and financial situation.

Extra Care Cover is an intermediated insurance product that can suit consumers with simple or complex needs, including consumers who either:

- have completed their own research, know what type of insurance they want and seek help with the application process
- want insurance that is tailored to their specific circumstances through a needs analysis and a fact find by a qualified financial adviser.

Consumers who apply for this product are comfortable to provide us with information about their health, financial situation, lifestyle, and pastimes for our assessment and they understand that the outcome of the assessment may be that they are not eligible for cover.

Extra Care Cover can be held in the superannuation environment or outside of the superannuation environment.

Product and key attributes

Extra Care Cover is designed for consumers with the needs and objectives set out below. It provides a way of topping-up OneCare cover with individual elements of Accidental Death Cover, Terminal Illness Cover or Extended Needle Stick Cover for medical professionals.

If Extra Care Cover is held in the superannuation environment, it does not provide Extended Needle Stick Cover.

Needs and objectives

Extra Care is designed to complement other OneCare cover and provide additional financial protection for consumers with the following objectives and needs:

Extra Care Accidental Death Benefit is designed for a consumer who has either of the following objectives and needs:

- has financial dependants and wants to continue providing financial support for the dependants in the event of their accidental death
- has (or envisages that in future they will or may have) outstanding financial commitments that will not be satisfied by their estate and any other insurance, or superannuation benefits, in the event of their accidental death. The financial commitments may include (but are not limited to) mortgage and other debt-servicing costs, and funeral costs.

Extra Care Terminal Illness Benefit is designed for a consumer who has either of the following objectives and needs:

- has financial dependants and wants to continue providing financial support for the dependants in the event of terminal illness diagnosis
- has (or envisages that in future they will or may have) outstanding financial commitments that will not be satisfied by their estate and any other insurance in the event of terminal illness diagnosis. The financial commitments may include (but are not limited to) mortgage and other debt-servicing costs, income replacement, medical costs, transport expenses and accommodation costs, personal and palliative care. They can also include funeral costs.

Extra Care Extended Needle Stick Benefit is designed for medical professionals if they accidentally acquire Hepatitis B or C, or HIV at work. The benefit could be used to pay for medical expenses and treatment costs and provides lifestyle choices.

Broadly, the target market is consumers who have or expect to have outstanding financial commitments that will not be met in the event of their accidental death, terminal illness diagnosis or medically acquired blood-borne illness, and who have capacity to pay premiums on an ongoing basis. As the product pays a lump sum on accidental death, terminal illness diagnosis or medically acquired blood-borne illness, it is likely to meet the needs, or go towards meeting the needs, of consumers in the target market.

If Extra Care Cover is held in superannuation, the target market is more specifically consumers who also:

- want to obtain Extra Care Cover within the superannuation environment
- understand and accept the additional risk of needing to meet a SIS condition of release to receive a benefit amount.

Eligibility requirements

When applying for Extra Care Cover, consumers must satisfy all of the following:

- are aged between 15 and 60
- are applying for, or already holding, other OneCare cover under the same policy
- are in Australia
- have Australian residency or are in the process of applying for permanent Australian residency.

Not all occupations are eligible for Extra Care Cover Extended Needle Stick benefit and access to this product is subject to occupation guidelines. Extra Care Cover is also subject to our assessment of health and pastimes and consumers with pre-existing health conditions or who participate in high risk occupations may not be eligible for cover.

Financial capacity

Extra Care Cover is designed for consumers who have the financial capacity to purchase it and to hold it over the timeframe identified for financial protection, ie. a consumer who has the financial capacity to pay premiums in accordance with the chosen premium structure, fees and government charges. This is important for these two reasons:

- the cost of cover will generally increase over time
- cover will be cancelled, and the life insured won't be covered, if premiums are not paid.

Appropriate consumers for Extra Care Cover held outside of superannuation will thus meet some or all of the following criteria:

- be earning income
- have personal savings
- have superannuation
- have other means to fund premiums, fees, and government charges, such as family or other relationships.

Appropriate consumers for Extra Care Cover held in superannuation will thus meet the following criteria:

- can pay insurance premiums funded by personal contributions, spouse contributions, employer contributions or by rollover from another superannuation fund.

Key exclusions

The following events are not covered under the Extended Needle Stick Benefit:

- if the life insured suffers HIV (occupationally acquired) or Hepatitis B or C (occupationally acquired) as a result of their intentional self-inflicted act
- for Hepatitis B or C (occupationally acquired) if any Australian Government approved medical treatment is developed for Hepatitis B or C (as applicable), which renders Hepatitis B or C (as applicable) inactive and non-infectious
- for HIV (occupationally acquired) if a medical treatment is developed that prevents AIDS occurring or if a medical 'cure' is found for AIDS or the effects of HIV. 'Cure' means any Australian Government approved treatment, which renders HIV inactive and non-infectious.

We will not pay an Extra Care Accidental Death Benefit if, as a result of the life insured's intentional self-inflicted act, they die during the first 13 months of any cover or any reinstated cover. This also applies to any increases in cover (excluding indexation increases) after the cover starts.

This product may be subject to additional exclusions, based on our assessment of an application.

Conditions and restrictions on distribution

In light of the obligations under Part 7.8A of the Corporations Act (product design and distribution obligations), an application for Extra Care Cover must be submitted by a Distributor who is operating under an AFSL with appropriate authorisations. The Distributor may only submit applications for consumers who satisfy all of the following:

- have received a current OneCare and OneCare Super PDS
- have been given personal or general financial advice
- are in Australia
- have Australian residency or are in the process of applying for permanent Australian residency.

The Distributor should not sell this product to a consumer who is unlikely to ever be eligible to claim the benefits under the policy.

These distribution conditions for Extra Care Cover are appropriate and will assist in distribution being directed towards the target market.

Personal advice

Consumers that obtain personal advice are more likely to be in the target market for Extra Care Cover because advisers have a duty to comply with the statutory best interests duty when providing personal advice.

The Distributor is expected to take into account any relevant information obtained about the consumer's financial situation, to ensure that Extra Care Cover is sold in accordance with this TMD. Relevant information could include (but is not limited to):

- dependants
- employment and income
- other insurance
- debts.

General advice

Consumers that obtain general advice are more likely to be in the target market if Distributors distribute the product in alignment with the issuer's distribution conditions relating to the relevant distribution channel, ie.

- consumer has been provided with general advice in relation to this product
- this product is only distributed to consumers who have completed their own research, know what type of insurance they want and seek help with the application process.

OPL's TMD review process

Review triggers

The following events and circumstances (review triggers) will trigger a review of this TMD as they may mean that it is no longer appropriate.

- The commencement of a significant change in law that materially affects the product design or distribution of the product or class of products that includes this product. This triggers a mandatory review. OPL may choose to undertake a review even if this review trigger is not met.
- Product performance is materially inconsistent with the product issuer's expectations of the appropriateness of the product to consumers having regard to:
 - product claims ratio
 - the number or rate of paid, denied, and withdrawn claims
 - the number of policies sold
 - policy lapse or cancellation rates
 - percentage of applications not accepted.
- The use of Product Intervention Powers in relation to the distribution or design of this product where OPL considers this reasonably suggests that this TMD is no longer appropriate.
- Significant or unexpectedly high number of complaints regarding product design, product availability, claims and distribution condition that would reasonably suggest that the TMD is no longer appropriate.
- OPL determines that a significant dealing in the product outside the target market (except for an excluded dealing) has occurred.
- Changes in medical advances impact product design or the market for the product.
- Distribution conditions set out in the TMD are otherwise no longer appropriate.

Maximum TMD lifespan

This TMD will be reviewed every 2 years. Any of the above review triggers will bring forward the 2 yearly review.

Reporting period for any complaints about this product

Distributors should report complaints to us half-yearly (end of March and September), within 10 business days of the end of the relevant half-year. The first complaints report is due for the period ending March 2022.

Complaints data should include sufficient information to understand the substance of each complaint but should not include personal information.

How OPL will decide if this TMD is no longer appropriate

OPL's product manager will review the information set out below on a regular basis to ensure that the TMD is still appropriate.

- Relevant regulation, legislation and/or ASIC instruments relating to the change in law.
- During the review period, expected and actual data for the following:
 - product claims ratio
 - the number or rate of paid, denied, and withdrawn claims
 - the number of policies sold
 - policy lapse or cancellation rates
 - percentage of applications not accepted.
- Relevant Product Intervention order.
- Complaints and the nature of the complaints regarding product design, claims and distribution condition.
- A significant dealing in the product which OPL's product manager becomes aware is not consistent with the TMD (within 10 business days of becoming aware of the dealing).

The following information collected from Distributors will be considered as part of the review:

- Complaints and the nature of the complaints regarding product design, claims and distribution condition (within 10 business days of the end of the half-year).
- A significant dealing in the product which the Distributor becomes aware is not consistent with the TMD (within 10 business days of becoming aware of the dealing).

Submitting data to OPL

Distributors may submit data to OPL in any of the accepted formats. Refer to our website for more information: onepathinsurance.com.au/tmd.
